(5.0 out of 5 stars) Hypnotic Beauty, June 2, 2009

Ken Elkinson's music immediately captures your attention with its intricacy. This album is both relaxing and inspiring. The beautiful melodies weave an almost hypnotic spell of beauty around the listener. This CD contains 12 new solo piano compositions that are perfect to listen to in the evening or anytime you want to connect with your soul. At times I listen to this CD as a calming meditation at other times I fall into blissful dreams at night. You may also want to listen to this album when reading as it creates a perfect background for learning and experiencing new information. The music is so pure and beautiful that I know it will capture your heart and expand your mind.
