

KEN ELKINSON- MIDNIGHT CONVERSATION

BL Midnight Conversation features solo piano compositions eerily reminiscent of George Winston's early work. Songs like "Waves" and the title track boast melancholy melodies sure to please hopeless romantics, with meditative textures that prove equally appropriate as relaxing background music or the perfect mood-setter for a candlelight dinner for two. It's not the sort of thing anyone would call exciting, so alt-rockers may find themselves exquisitely bored, and I certainly wouldn't recommend it for the chronically depressed. But anyone with a penchant for romance, introspection, or meditation will find Elkinson's music as soothing as a gentle spring breeze.
